Important Disclaimers

- Students who have successfully enrolled in the Accelerated Program must submit a separate [enrollment request form](#) for each graduate course for approval by the Graduate College, choosing to apply these graduate credits towards your "accelerated undergrad/grad program."
- Enrollment in the Accelerated Program in Economics does not imply an automatic admission to a Master's program. Students will still need to formally apply to the Graduate College.
- ECON 440 may be accepted as a MATH 181 equivalent, subject to approval.
